Artículo 5, fracción III de la Ley de Disciplina Financiera de las Entidades Federativas y los Municipios. Riesgos relevantes para las finanzas públicas.

El monto de los recursos a ejercer que contempla el presente Presupuesto de Egresos, puede ser afectado por una reducción en la disponibilidad de recursos federales, así como locales; adicional a ello se podría presentar modificaciones a las condiciones económicas con las cuales se generaron los supuestos para el financiamiento del mismo; efectos climatológicos adversos, como sequías e inundaciones, que impacten cultivos, granos básicos y rutas comerciales, afectando la fijación en los precios de productos agropecuarios y energéticos, así como la actividad económica.

Además, las tensiones geopolíticas podrían interrumpir las cadenas de suministro, ocasionando retrasos en tiempos de envío y presiones inflacionarias en costos de distribución. Una desaceleración económica global mayor a la prevista podría reducir la demanda interna, las exportaciones, el envío de remesas y la llegada de turistas, generando volatilidad en los mercados financieros internacionales.

Por otra parte, el incremento del salario mínimo en años recientes en México trajo consigo un beneficio social, no obstante, cualquier aumento subsecuente podría representar una carga financiera para las empresas; lo que puede desalentar la creación de empleo y provocar desempleo e incluso alentar la economía informal. En consecuencia, la recaudación podría verse impactada por una menor captación de ingresos locales, posibles retrasos en la entrega de recursos federales y la presión generada por factores económicos, sociales, políticos o de cualquier otra índole, tanto a nivel global como local.

RESUMEN EJECUTIVO

La Ley de Disciplina Financiera ha señalado que las Entidades Gubernamentales deben realizar la Valuación Actuarial del Plan de Pensiones de Personal motivo de la presente Valuación.

Por otro lado, la Norma de Información Financiera (NIF) D-3, "Beneficios a los empleados", tiene por objeto establecer las normas de valuación, presentación y revelación para el reconocimiento inicial y posterior en los estados financiero de la entidad de los beneficios que ésta otorga a sus empleados.

Las Valuaciones Actuariales fueron practicadas para así dar cumplimiento a la Ley como a la Norma de acuerdo a los principios contables establecidos, con el registro de dicho pasivo laboral en los estados financieros.

En la presente valuación actuarial se calcularon los beneficios por Pensiones de Personal como "*planes de beneficio post-empleo*" como lo señala la propia NIF D-3, al 31 de diciembre de 2024 y proyectados al 2025.

A continuación, se presenta un cuadro con el resumen estadístico de los datos demográficos, financieros y de comportamiento poblacional que sirvieron de base para la realización de la Valuación Actuarial que nos ocupa.

De acuerdo a la disposición de la NIF D-3 los beneficios a los empleados se calcularon bajo los siguientes lineamientos:

Beneficios post-empleo

Son remuneraciones acumulativas que generan beneficios futuros a los empleados que ofrece la entidad a cambio de los servicios actuales del empleado, cuyo derecho se otorga al empleado durante su relación laboral y se adquieren por el empleado y/o sus beneficiarios, al momento del retiro de la entidad y/o al alcanzar la edad de jubilación o retiro u otra condición de elegibilidad.

Son acuerdos formales e informales, en los que la entidad se compromete a suministrar beneficios a uno o más empleados tras la terminación de su periodo de empleo, como lo es la prima de antigüedad por todas las causas atribuibles, pagos por indemnizaciones, compensaciones o liquidaciones con condiciones preexistentes.

A continuación, se presenta un cuadro con el resumen general de los resultados totales de la valuación actuarial. Cifras que deberán ser registrados en el Estado de la Situación Financiera como es la Obligación de Beneficios Definidos (OBD); en el Estado de Resultados como es el Costo Neto del Periodo (CNP) y las Remediciones mismas que se registrarán en Otros Resultados Integrales (ORI).

INTRODUCCIÓN

En la actualidad las organizaciones sean cuál sea su línea de operación requieren de información financiera que incluya todos aquellos elementos que le permitan reflejar de manera razonable su estado de solidez a una cierta fecha.

Existen pasivos inciertos de realizarse, cuya naturaleza hace que no sean fáciles de cualificar a los cuales se les denomina pasivos contingentes, para que se hagan efectivos es necesario que se realice una eventualidad y que en esencia es la que genera una obligación.

La Norma de Información Financiera (NIF) D-3, "Beneficios a los empleados", tiene por objeto establecer las normas de valuación, presentación y revelación para el reconocimiento inicial y posterior en los estados financiero de la entidad de los beneficios que ésta otorga a sus empleados.

Esta NIF debe aplicarse por todo tipo de entidades que emitan estados financieros en los términos establecidos por la NIF A-3, *Necesidades de los usuarios y objetivos de los estados financieros* y que devenguen obligaciones en su calidad de patrones por beneficios a los empleados.
